

Life Processes

Name: _____ # _____

Date: _____ Core: _____

Directions: Draw/find a picture that demonstrates the life processes below. At least one has to be at the cellular level. Be sure to add color and do your best work.

Digestion	Ingestion
Cellular Respiration	Regulation
Reproduction	Transport
Excretion	*Photosynthesis

Life Processes happen at the **cellular** level—each cell performs all of them and has a cell part responsible for doing each.

They also happen at the **organism** level—each multi-cellular organism will perform all the life processes and has one or two organ system responsible for each.

*Photosynthesis does not happen in all living things...only plants and producers.
