

# Precipitation

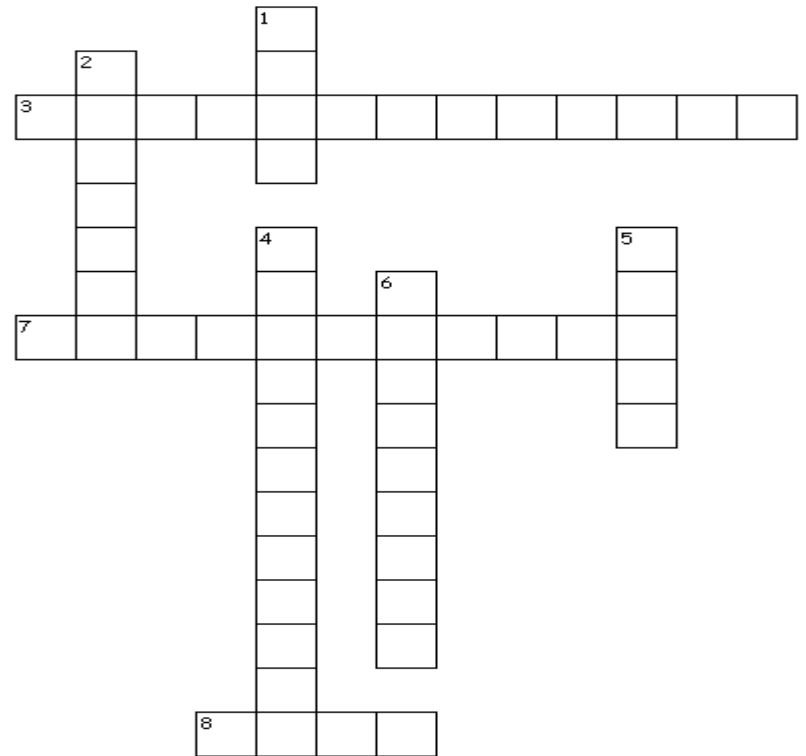

## Across

- 3. part of the water cycle where water falls to Earth in liquid or solid form
- 7. factor that decides which type of precipitation you will receive
- 8. freezes into a crystal in the cloud and then falls to Earth in frozen form

## Down

- 1. ice that gets tossed up and down in clouds building in layers of ice; falls as a clump of ice
- 2. small sized drops of rain
- 4. freezes when it lands on the ground or another surface that is cold
- 5. rain that freezes as it falls and lands as ice pellets
- 6. tool used to measure the amount of rainfall
