

**Bill Nye - Water Cycle**

1. Identify the three phases of water that Bill names and give an example.
2. The water is also known as the hydrological cycle. \_\_\_\_\_ is Greek for \_\_\_\_\_.
3. The process where energy converts water from a liquid to a vapor is \_\_\_\_\_.
4. What has to happen for water to change from a vapor to another phase?
5. Define condensation:
6. Precipitation occurs when water returns to \_\_\_\_\_ surface.
7. Give some examples of collection.
8. Why do molecules need movement to evaporate?
9. How is water 'recycled'?
10. What does water vapor 'stick' to when forming clouds?
11. What role does the Sun have in the water cycle?
12. Give 4 examples of precipitation:
  - a.
  - b.
  - c.
  - d.
